Mary, Neilda and Marion:

We would like to have a call with you to walk you through our letter to the registrants on neonic products either later today or early Monday morning.

The letter states that label language will follow by mid-August, calls in efficacy data specific to translocation information, states that 6a2 data must be submitted within 10 days, and requests submittal of their stewardship programs.

We hope to send the letters out Monday afternoon but want to walk you through them first. Meredith Laws is coordinating the effort in RD.

Please let us know your availability.

Thanks,

Lois
